# Active DataComm® Web Design and Maintenance Services

Design • Development • Maintenance • Consultation • Hosting

## Design and Development

From simple pages to complex suites of sites, Active DataComm can design and implement your concept from start to finish, and our graphic design department can design any custom logos and graphics that you can imagine. Let us turn your website ideas into reality. Discounts are available for projects based on our pre-designed templates; view the templates currently available here.

## Website Maintenance and Expansion

Is your website out of date or missing important information? Are you tired of dead links and error messages on your site? From simple updates and maintenance to a complete overhaul based on your current design, Active DataComm can help you develop a web site you can be proud of.

## Website Consultation

Need advice on pay-per-click advertising? Are you happy with your website, but have questions about what else might be possible, or just need an expert to assist you with an issue? Call Active DataComm and get your questions answered.

*When it comes to websites, email, hosting, and more, Active DataComm® is your "Trusted Advisor".*

Content Management System (CMS) Powered Web Site Products and Hosting	Price
<b><i>Search Engine-Friendly, Easier to Update and Maintain</i></b>	
A Content Management System, or CMS, is a hosted software package that allows users to update and add to their own sites' content. A user-friendly interface makes managing a site almost as easy as using a word processor, and training by Active DataComm is available.  Active DataComm uses Joomla!, which is a free, open-source, state-of-the-art package capable of handling everything from a simple blog to a massive collection of pages or articles. Joomla! can be installed on any of our hosting packages very quickly, and with a staggering choice of templates available, you can choose a look and feel that fits you or your company perfectly, and change your site's look any time, without the need to re-create all of your content.
